

## No Men in the Women's Sports Category

**Title of Resolution:** No Males in Female Sports

**Wording of Resolution:** The NFWI calls upon the British Government to follow the lead of the Trump Administration and stop men from competing in the women's category. Women's sports must be protected from grassroot to elite level from mediocre men claiming to be women. This would be policed by an unobtrusive cheek swab.

**The Issue:** Men with disorders of sex development, such as Imane Kelif and Caster Semenya are being allowed by sports governing bodies to participate in the women's category. Furthermore men who identify as women are being allowed into female categories, such as Laurel Hubbard. These men have an unfair advantage. Women and girls who object to these policies are often castigated and punished for their views.

**Objectives:** Reinstate fairness at all levels of women's sports, reinstate cheek swab sex testing at higher levels of sports, ensure rigour in the women's category to ensure it is only for women.

**Potential:** Work with national and international sports governing bodies and the IOC to ensure fairness to females.
